## Features & Benefits

### Under Cabinet Glide Out Hood

Hidden hood built over the cooktop, this discrete hood is only visible when in use. It can be smoothly pulled out to activate the extractor while cooking, and pushed back into place when idle, offering a classic way to finish your kitchen.

### Two Speed Fan

High and low setting to allow proper ventilation of your kitchen as needed.

### Removable Honeycomb Filters

Easy installation and detaching allows you to properly clean the filters for optimum efficiency.

### Rocker Switch Controls

Front-located on/off and high/low switches make it easy to manage the light and fan.

### LED Light Strips

Includes two LED strips to help illuminate your cooking surface, increase visibility, and are more energy efficient.

### Powder Coating Gray and Stainless Steel Finish

Durable construction in an attractive style with a stainless steel handle that can be replaced with matching cabinetry.

### Cabinet Preparation for Hood Support

- The range hood should be mounted at a minimum distance of 24" from an electric or induction cooktop, and a minimum distance of 30" above a gas cooktop for safety and optimum performance.
- To install the hood with a duct, you will need to provide a hole for the duct.
- Please use the template provided to correctly place the hole.

- Use the diagram above for correct placement of ductwork and electrical cut-out in cabinets.

### RECOMMENDED CABINET MINIMUM CLEARANCE

For optimal performance, the distance from the cooking surface to the bottom of the range hood should be between 24" and 30", unless otherwise noted. DO NOT install a range hood less than 24" above cooking surface.

\*Minimum. 24" clearance space must be present between an electric or induction cook-top and the range hood, 30" min clearance is required above gas cook-tops.
